

Equality fund

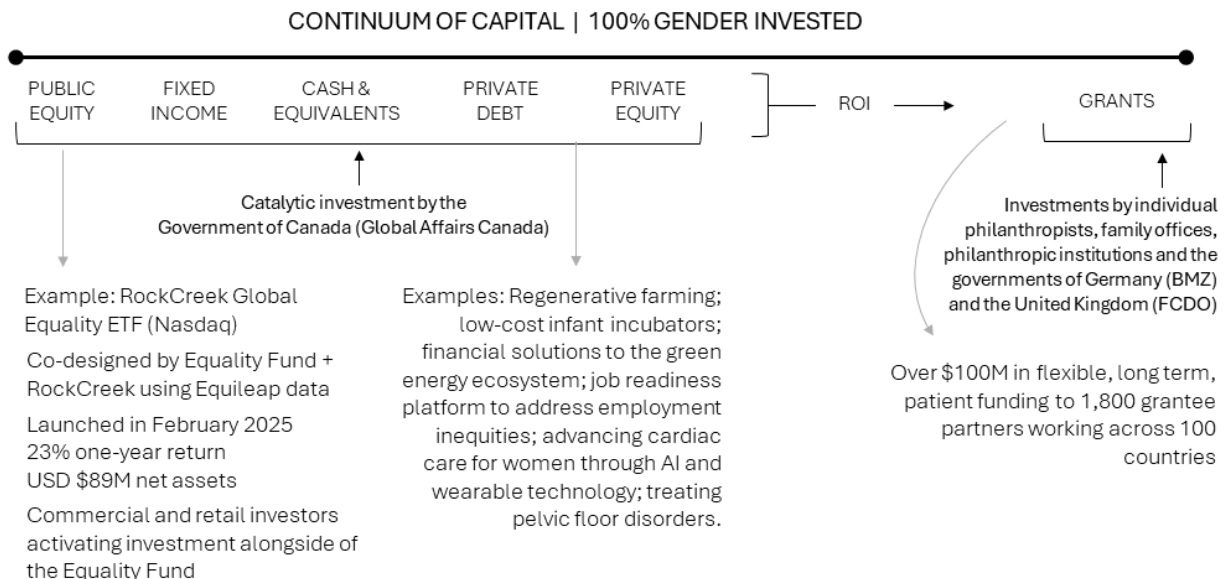

WHEN WE MOVE TOGETHER, WE MOVE THE WORLD

The Equality Fund is a global fund investing in people with local solutions for the world's most complex problems. We fuel the ideas, wisdom, experience and networks of local leaders to create lasting change in their own lives, communities, countries and regions.

We focus on gender equality because it's an evidence-based strategy for achieving greater peace and prosperity. Gender-focused funding has a unique catalytic effect, accelerating progress across all UN Sustainable Development Goals and ensuring no one is left behind.

\$598M
ACTIVATED FOR GENDER
EQUALITY OVER SEVEN YEARS

We work to activate different types of money, as many times as possible inside of an integrated impact strategy. And, create multiple entry points for partners and allies to leverage impact together.

Our investment and grantmaking portfolios are 100% gender aligned. Since 2019, the for-profit investment portfolio has earned a 7.5% annual rate of return (11.4% ARR over the past three years). The value of the portfolio is currently \$356.2 million, with \$108.3 million in investment earnings and \$48.2 million distributed from the portfolio to Equality Fund operations and grants.

The foundational elements of our model are working well, generating impact and creating opportunities to stretch into new areas along the continuum of capital in which we are not yet activated. Innovation happens at intersections, edges, and blindspots where different approaches, backgrounds, experiences, and cultures collide. The Equality Fund is firmly grounded at a unique four-way intersection: gender-lens investing, feminist philanthropy, global grantmaking and policy influence. We look forward to activating in new places and spaces – like Wilton Park – to explore what becomes possible at these intersections. When we move together, we can move the world.
